Evaluation

Introduction

Initial pilot test

Introduction Describe methodology used

- Describe results
- Describe comments and feedback
- Verified that it was approachable and basically worked as a NUI application
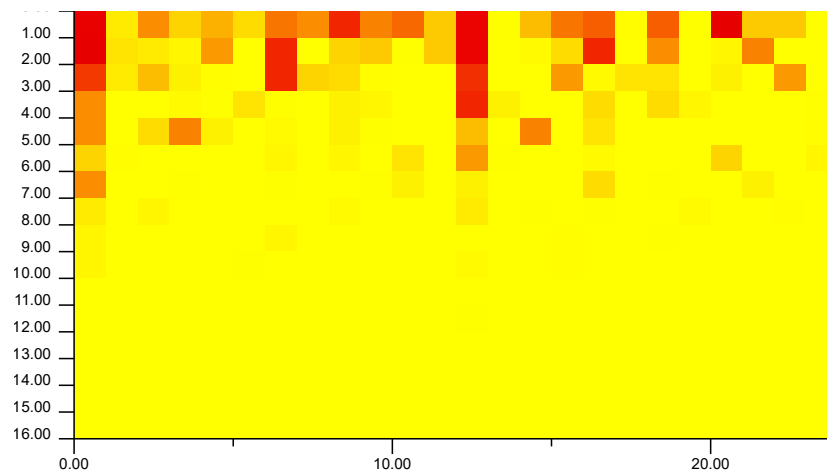

Exhibition

Figure 1: Heat graph displaying note start points

As you can see in the figure 1, the majority of activity is in the upper regions of the frequency spectrum and concentrated at the beginning and the middle of the screen.
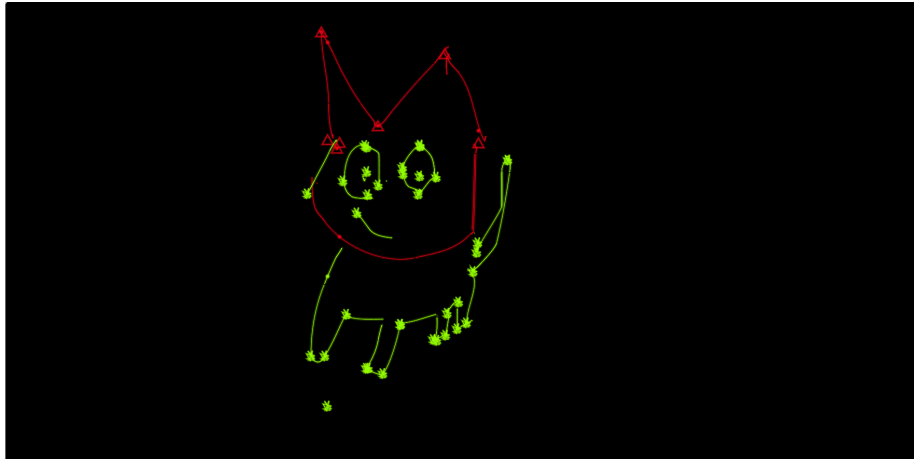

Figure 2: Some exhibit participants managed to draw figurative artwork!

Conclusion
